

RITHWIK BODIGA

Software Development Engineer · Gold Medalist (B.Tech CSE)

Hyderabad, India · +91-7675832677 · bodiga.rithwika@gmail.com · [linkedin.com/in/rithwika-bodiga](https://www.linkedin.com/in/rithwika-bodiga) · github.com/rithwikab · [Portfolio](#)

CAREER SUMMARY

Backend Engineer and **B.Tech Gold Medalist** with an **Adobe Pre-Placement Offer (PPO)**. Built **scalable backend systems** including an asynchronous **payments reconciliation platform** and an **AI-assisted task management system** with secure access control. Interested in **solving large-scale engineering problems** through reliable system design, distributed workflows, and practical AI integration.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL, Typescript

Backend: Node.js, Express.js, REST APIs, RBAC, JWT, Redis, BullMQ, MongoDB

Cloud & DevOps: Docker, AWS, Git

Core CS: Data Structures & Algorithms, System Design

AI / Integrations: LLM Integration

PERSONAL PROJECTS

Tool Minifier SDK - **Skills:** TypeScript · Node.js · React.js · MCP · REST API · Cryptography [Github](#)

[Demo](#) · [Github](#)

Open-source npm package and licensing platform that shrinks structured data sent to AI models, cutting how much an AI assistant has to read (and what it costs) per request.

- Published npm SDK + proxy that automatically compresses data sent to AI models by up to 85%, with an offline-verifiable licensing system supporting real-time revocation.

Payments Reconciliation System - **Skills:** Node.js · Express · MongoDB · Docker · RBAC · JWT

[Github](#)

Backend reconciliation engine for processing and validating high-volume financial records with fault tolerance and idempotent execution.

- Designed a dockerized reconciliation pipeline processing 25K+ financial records at ~1.2s avg latency, using deterministic hashing and idempotent execution for duplicate-safe, fault-tolerant processing.

HR-JIRA Task Management System - **Skills:** Node.js · Express · MongoDB · LLM Integration

[Github](#)

Backend task orchestration platform with AI-assisted categorization and secure role-based workflows.

- Built a RESTful task orchestration platform with RBAC/JWT authorization, AI-assisted task categorization, and asynchronous fallback handling for external AI service failures.

TECHNICAL EXPERIENCE

Customer Experience Maker Intern (CXM) | Adobe India

Jun 2022 – Aug 2022

Stack: REST APIs · Power Automate · Power BI · Excel

- Built enterprise **integration workflows** using **custom APIs** to process and **synchronize 10,000+** onboarding records.
- Reduced** onboarding **turnaround time** by ~95% through automation & received a **Pre-Placement Offer (PPO)** for **technical contribution**.

Portfolio Management Intern | Oxane Partners

Jan 2026 – May 2026

Stack: SQL · VBA · Excel

- Automated portfolio data validation using **SQL-driven reconciliation logic** and VBA workflows, reducing manual verification across multi-institutional financial datasets.
- Validated data consistency for **70+ commercial real estate debt portfolios** by cross-checking platform records against source reports, improving reconciliation reliability.

EDUCATION

B.Tech, Computer Science & Engineering

Jun 2019 – Jul 2023

Keshav Memorial Institute of Technology, Hyderabad · CGPA: **8.66 / 10** · **College Topper**

Post Graduate Diploma, Business Analytics & Finance

Jul 2024 – Jul 2026

Institute of Public Enterprise, Hyderabad · Percentage: **87.71%** · CAT: **94.84 Percentile**

ACHIEVEMENTS

- College Topper – Gold Medalist** — Keshav Memorial Institute of Technology
- Adobe Pre-Placement Offer (PPO)**
